

# Counting machine

for tablets, capsules and any kind of small components

## Minicount

the best way to count

- ▶ quick change-over
- ▶ simple cleaning
- ▶ easy to operate

The Minicount is an universal counting machine for all kinds and forms of tablets, capsules, dragées etc. without changing parts.

The construction is based on pharmaceutical conditions and is easy to clean, because all contact parts can be removed tool-free.

The Minicount is controlled by a processor application and has a touch screen control panel. The basic unit is made of stainless steel and has an integrated processor control, a supply hopper, a twin count head, a 2 track vibratory feeder, a discharge funnel and a transparent dust cover.

#### Output Single version:

- up to 1500 tablets/min.

#### Output Twin version:

- up to 3000 tablets/min.

#### ▶ Optional equipment:

- Adjustable container platform
- Automatic container transportation system
- also available as control system for counting machines
